

Cats can be hard to read. **vmrdSAA** can help.

In-Clinic Test

for rapid, objective assessment

Numerical results

with handheld reader

Serum amyloid A (SAA) is an acute inflammatory biomarker that can help diagnose infection and monitor treatment efficacy. Used extensively in horses for years, veterinarians can now utilize this valuable tool in cats with the VMRD SAA product for Feline!

Multiple tests, one handheld reader - now with RECHARGEABLE battery!

- ✓ Ideal size with convenient storage case
- ✓ Calibration for accuracy & consistency
- ✓ Will not lose your results
- ✓ Automatically reads test results at 10 minutes
